

An aerial photograph of a city, likely Los Angeles, showing a dense urban landscape with various buildings, streets, and green spaces. The top of the image features a solid red header. In the upper left corner of the header, there is a white rectangular box containing a logo with the letters 'LA' and some illegible text below it. The main body of the image is the city view, and the bottom portion is a solid black footer.

The Integrated Postsecondary Education Data System (IPEDS) is a system of survey components that collects data from all institutions that provide postsecondary education and are eligible to receive Title IV funding across the United States and other U.S. jurisdictions.

These data are used at the federal and state level for policy analysis and development; at the institutional level for benchmarking and peer analysis; and by students and parents, through the College Navigator

7CAD5F:GCB ; FCID

Comparison group data are included to provide a context for interpreting your institution's indicators. If your institution did not define a custom comparison group for this report by July 15, 2022 NCES selected a comparison group for you. (In this case, the characteristics used to define the comparison group appears below.) The customized Data Feedback Report function available at <https://nces.ed.gov/ipeds/use-the-data/> can be used to reproduce the figures in this report using different peer groups.

The custom comparison group chosen by Kentucky State University includes the following 15 institutions:

▶ [Allen University](#)

NOTE: Retention rates are measured from the fall of first enrollment to the following fall. Academic reporting institutions report retention data for the Fall 2020 cohort of students who are still enrolled as of the institution's official fall reporting date or as of October 15, 2021. Program reporters determine the cohort with enrollment any time between August 1 - October 31, 2020 and retention based on August 1, 2021. Four-year institutions report retention rates for students seeking a bachelor's degree. For more details, see the Methodological Notes. N is the number of institutions in the comparison group.

NOTE: Award measures are based on the highest award received after 8 years of entry and enrollment measures are based on students who did not receive an award after 8 years of entry. Student cohorts (i.e., first-time, full-time; first-time, part-time; non-first-time, full-time; and non-first-time, part-time) are degree/certificate-seeking undergraduate students who entered the institution between July 1, 2013-June 30, 2014. Pell recipients are students with demonstrated financial need. For more details, see the Methodological Notes. N is the number of institutions in the comparison group. Medians are not reported for comparison groups with less than three values.

This report is based on data supplied by institutions to IPEDS during 2021-22 data collection year. Response rates exceeded 99% for most survey components. IPEDS data release memos at <https://nces.ed.gov/ipeds/use-the-data/survey-components> provide an overview of the number of institutions responding to the survey components. Furthermore, data used in this report are provisional level and may be revised for a limited time through the IPEDS Prior Year Revision system.

This report compares your institution's data to the median value for the comparison group for each indicator shown in the figure. If more than one indicator is present in a figure, the median values are determined separately for each indicator. Medians are not displayed for comparison groups with fewer than three values. Where percentage distributions are presented, median values may not add to 100%. To access all the data used to create the figures included in this report, go to 'Use the Data' portal on the IPEDS website at this provided link (<https://nces.ed.gov/ipeds>).

A] gg] b ['=bX] WUhcf g

If an indicator is not reported for your institution, the omission implies that the indicator is not relevant to your institution and the data were not collected. Not all notes may be applicable to your report.

I gY' cZ' = a d i hYX' 8UhU

All IPEDS data are subject to imputation for total (institutional) and partial (item) nonresponse. If necessary, imputed values were used to prepare your report.

Ò}:[|| {^}cÔ[~}c•

12-month Enrollment captures a cumulative unduplicated headcount of enrollment over the full 12-month period beginning July 1 and ending June 30. In contrast, Fall Enrollment captures number of students enrolled on a particular date in the fall. Fall enrollment is often referred to as a "snapshot" of an institution's enrollment at a specific time.

ØVÔiÔ}:[|| {^}c

The full-time equivalent (FTE) enrollment used in this report is the sum of the institution's FTE undergraduate enrollment and FTE graduate enrollment (as calculated from or reported on the 12-month Enrollment survey component). Undergraduate and graduate FTE are estimated using 12-month instructional activity (credit and/or clock hours). See "Calculation of FTE Students (using instructional activity)" in the IPEDS Glossary at <https://surveys.nces.ed.gov/ipeds/VisGlossaryAll.aspx>.

Ô[{]|^c[] •hæ}ãÔ[{]|^c^!•

Completions collects data on undergraduate and graduate completions and completers in a 12-month period. Completions are the counts of postsecondary awards granted where each award reported once but multiple awards may be reported for one recipient. Completers are the counts of students granted postsecondary awards. The count of completers is collected in two ways. The first way counts all completers, while

Core revenues for private, not-for-profit institutions (and a small number of public institutions) reporting under FASB reporting standards include tuition and fees; government (federal, state, and local) appropriations and grants/contracts; private gifts, grants and contracts (including contributions from affiliated entities); investment return; sales and services of educational activities; and other sources (a generated category of total revenues minus the sum of core and noncore categories on the Finance survey component). "Other core revenues" include government (federal, state, and local) appropriations, sales and services of educational activities, and other sources.

Core revenues for private, for-profit institutions reporting under FASB reporting standards include tuition and fees; government (federal, state, and local) appropriations and grants/contracts; private grants/ contracts; investment income; sales and services of educational activities; and other sources (a generated category of total revenues minus the sum of core and noncore categories on the Finance survey component). "Other core revenues" include government (federal, state, and local) appropriations and other sources.

At degree-granting institutions, core revenues exclude revenues from auxiliary enterprises (e.g., bookstores and dormitories), hospitals, and independent operations. Non-degree-granting institutions do not report revenue from auxiliary enterprises in a separate category, and thus may include these amounts in the core revenues from other sources.

Ô[!^!Ô#] ^} •^•

Core expenses include expenses for instruction, research, public service, academic support, student services, institutional support, scholarships and fellowships (GASB) or net grant aid to students (FASB) and other expenses. Core expenses exclude expenses for auxiliary enterprises, hospitals, and independent operations. "Other core expenses" is the sum of grant aid/scholarships and fellowships and other expenses.

Ò}â[, { ^}c!CE••^c•

Endowment assets, for public institutions under GASB reporting standards, and private, not-for-profit institutions under FASB reporting standards, include gross investments of endowment funds, term endowment funds, and funds functioning as endowment for the institution and any of its foundations and other affiliated organizations. Private, for-profit institutions under FASB do not hold or report endowment assets.

Ûæ|æ|î^•!æ} â! Yæ *^•

Salaries and wages for public institutions under GASB reporting standards and private (not-for-profit and for-profit) institutions under FASB reporting standards, include amounts paid as compensation for services to all employees regardless of the duration of service, including all regular or periodic payments to a person for the regular or periodic performance of work or a service and payment to a person for more sporadic performance of work or a services (e.g., overtime, extra compensation, summer compensation, bonuses, sick or annual leave, etc.)

GhUZZ

ØVÔ!Ûcæ~

The full-time-equivalent (FTE) by occupational category is calculated by summing the total number of full-time staff and adding one-third of the total number of part-time staff. Occupational categories include instructional staff, research staff, public service staff, instructional support staff, management staff, and other occupations. Instructional staff are primarily engaged in teaching and do a combination of teaching, research, and/or public service. Research staff are staff whose primary function is research while public service staff are staff whose primary function is public service. Instructional support occupations include archivists, curators, and museum technicians; librarians and media collections specialists; librarian technicians; student and academic affairs and other education services occupations. Other staff include staff in service occupations; sales and related occupations; office and administrative support occupations; natural resources, construction, and maintenance occupations; production, transportation and material moving occupations; and military specific occupations. Graduate assistants are not included.

Ò ~ æc^â!P [] È T^â!&æ|!0 } •c! ~ &c! [] æ|hÛcæ~!Ûæ|æ|î^•

Institutions report the number of full-time non-medical instructional staff and their salary outlays by academic rank, gender, and the number of months worked (9-, 10-, 11-, and 12-months). Salary outlays for staff who worked 10-, 11-, and 12-months were equated to 9-months of work by multiplying the outlays reported for 10-months by 0.90, the outlays reported for 11 months by 0.818, and the outlays reported for 12-months by 0.75. The equated 10-, 11-, and 12-outlays were then added to the outlays for instructional staff that worked 9-months to generate a total 9-month equated salary outlay. The total 9-month equated outlay was then divided by total number of non-medical instructional staff to determine an equated 9-month average salary. This calculation was done for each academic rank. Salary outlays were not reported for staff that work less than 9-months and were excluded.

Ùc ~ ä^} cËc [ËØæ& ~]c ~ ÅÜæcâ [

Institutions can provide their institution's student-to-faculty ratio (i.e., student-to-instructional staff) for undergraduate programs or follow the NCES guidance in calculating their student-to-faculty ratio, which is as follows: the number of FTE students (using Fall Enrollment survey component data) divided by total FTE instructional staff (using the total primarily instruction + instruction/research/public service staff reported in Human Resources survey component and adding any not primarily instructional staff that are teaching a credit course). For this calculation, FTE for students is equal to the number of the full-time students plus one-third the number of part-time students; FTE for instructional staff is similarly calculated. Students in "stand-alone" graduate or professional programs (such as, medicine, law, veterinary, dentistry, social work, or public health) and instructional staff teaching in these programs are excluded from the FTE calculations.
